

DD/A 76-4366

30 August 1976

MEMORANDUM FOR: Deputy Director for Administration

FROM : James H. McDonald
Director of Logistics

SUBJECT : Headquarters Building Photography

REFERENCE : Memo dtd 26 August 1976 to DD/A from
DDCI, same subject

Jack:

1. To our knowledge, no serious effort has been made to maintain a file of historical photography of the Headquarters Building with the exception of those in the historical collection maintained by Walter Phorzheimer. These are primarily corner-stone layings, visiting dignitaries, and perhaps some construction progress photos of the Headquarters Building.

STATINTL 2. We do know that Security has a good number of photographs as do we in our Real Estate and Construction Division and Printing and Photography Division. In addition, [REDACTED] has made a career of photographing the building. In view of this, I have asked [REDACTED] to gather up STATINTL from all of these sources whatever material he can which should take a week or two since some of the material will have to be returned from Archives. At that time, I suggest we go over them with you and you can select those which you think may be of interest to Mr. Knoche.

3. With respect to maintaining a file of historical photography of our building (external and internal) and the grounds, I would suggest that, after we get an idea of the types of photography Mr. Knoche and you are interested in keeping, we assign this responsibility to the Logistics Services Division. On this basis, we can be sure that significant modifications to the building or the grounds

OL 6 4406

SUBJECT: Headquarters Building Photography

are photographed both before and after since LSD would undoubtedly process the bulk of the work orders.

26 August 1976

MEMORANDUM FOR: Deputy Director for Administration

Jack:

1. For a long time I have wanted to pass along to you and your colleagues my personal salute and thanks for the excellent appearance of our campus grounds -- particularly when compared with a couple of years ago.

2. I know that whatever was done to improve the situation must have required deep patience and subtle operational skills, given the hardness of budgets and the inertia of GSA.

3. At a convenient time, I would like to go over with you any "before and after" photos you might have and to tour the grounds with you to get a more direct understanding of what was done and how. ✓

4. Incidentally, do we have a plan to keep historical photography of our building (external and internal) and grounds so that posterity will have a view of our evolution? ✓
